DETAILED ACTION

Claims 1-20 are pending.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4, 9-14, and 16, drawn to a process for producing a film containing a chemotactic factor substance, classified in class 435, subclass 29.
- II. Claims 5-8, 15, and 17-20, drawn to an artificial material and a process for producing an artificial material, classified in class 435, subclass 29.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different effects, since Invention II requires the application of a solution containing the chemotactic factor substance to the area of the film, which is not required by Invention I. Additionally, Invention I does not require a substrate, which is required by Invention II.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1651

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
